DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 drawn to a turbocharger life determining algorithm, classified in class 701, subclass 29.
 - II. Claims 14-20, drawn to a method of determining a life of a turbocharger, classified in class 73, subclass 119R.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a computer readable data storage medium including a turbocharger life determining algorithm. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Atty. Michael McNeil (35,949) on 7/26/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2855

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
